School of Business, The American University in Cairo, Egypt

Track 6: Digital Application in Health, Education, and Government

Track description

The application of digital technologies in healthcare, education, and government is ubiquitous. This includes rather standardized applications, like healthcare information systems, but also includes the application of current digital technologies like artificial intelligence, augmented or virtual reality, dashboards or low code applications. Therefore, this track adopts research as well practical perspectives.

Possible topics

Topics of interest include, but are not limited to:

1. The role of AI, virtual & augmented reality in professional practice situations.
2. Emerging issues for various types of organizations (healthcare, education, government) from the technological change perspectives
3. Prospective changes in the next ten years.
4. Knowledge, skills, & attitudes needed for the coming future and changes.
5. The digital transformation in healthcare, education, and government all over the world and in particular in developing countries.
6. Maximizing benefits from the digital revolution in/for healthcare, education, and government.
7. Leveraging digital transformation in healthcare, education, and government for the general good.

Important Dates

Paper Submission Deadline: 31st January 2024
