*Blended delivery combines both live-online sessions and on-campus sessions.

Program Overview

Fast-paced globalization, accelerating technological innovations and greater customer expectations are impacting supply chain excellence. Agility, resilience, and digitization are core competencies to mitigate risks and disruptions that shake today's business operations.

The Supply Chain Management Professional Certificate provides a holistic approach to business model alignment, strategic priorities, and organizational capabilities. The certificate helps participants meet the shifting requirements occurring in domestic and global supply chains – such as the demands brought about by the COVID-19 pandemic. During the program, participants will be exposed to the different perspectives of supply chain design: from supply chains as systems, digital opportunities, and challenges to the development of human capital in supply chains.

By the end of the program, participants will be able to challenge the status quo and build a competitive supply chain functional structure and process model aligned with corporate strategy, organizational structure, and other influencing factors.
