IT Data Center and IT Rooms Access Policy

Policy Statement

AUC central digital computing assets must be protected by all means, this includes securing adequately the physical security of IT devices located in IT data center and IT rooms. All reasonable controls should be implemented as securing AUC data starts with securing the devices and core network infrastructure.

Reason for Policy/Purpose

The purpose of this patch management policy is to enable AUC to:

Ensure community are fully aware of the requisite security needed to secure the data centers and IT rooms from any unauthorized access

Who Approved This Policy

Nagwa Nicola, Chief Technology Officer

Who Needs to Know This Policy

Entire AUC community

Definitions

Term	Definition as it relates to this policy
Vulnerability	Weakness in system or application that allows attackers or abusers to an take advantage and affect the system/application confidentiality, integrity or availability.
Patch	Is a code or software update that covers/solves a certain vulnerability
Digital Computing Asset	PC, Laptop, Server, Printer, Network device, storage device, phones.....etc.

Policy/Procedures

1. All infrastructure devices and IT services should be protected from any physical tampering, sabotage, interference or unauthorized physical access.
2. All IT services and its associated devices shall be collected into centralized physically protected places like data centers and dedicated IT rooms in buildings.
3. Devices setup and arrangement should follow international standards to ensure the adequate protection for the assets.
4. Data Centers and IT rooms should be protected by appropriate physical controls like appropriate locks and CCTV surveillance according to the criticality.
5. Data Centers and IT rooms cannot be used for any other purpose or as a storage facility.
6. Access to Data Centers and IT rooms should be granted to authorized persons only.
7. Visitors must be escorted at all times.
8. All visits and access actions should be logged appropriately.
9. Protection against disasters and environmental incidents should be well implemented.
10. Access rights should be reviewed periodically.
11. When applicable, racks doors should be locked
12. Access controls logs and CCTV surveillance recording logs should be kept adequately and historical data should be kept for an acceptable time span.
13. Central IT Office is the only entity authorized to allow the creation of IT data center and IT rooms, Schools and special research units should grant IT formal approval.
14. AUC IT services shouldn't be allocated outside approved central IT data center/IT rooms. Exceptions must be approved by both the CTO and Principal Campus Information Security Officer.

Exceptions

Exceptions should be as minimum, if exist they should be approved by Information Security Office and Infrastructure director.

Enforcement

Any user found to have violated this policy (or part thereof) may be subject to disciplinary action, up to and including termination of employment or dismissal from the University
