A Red Face is reported by the self-check or through the Clinic (via e-mail medcalserv@aucegypt.edu or emergency phone 012 8000 1039).

The Clinic verifies the case through medical reports, blood test and C.T. chest (confirmed / probable case).

The medical team will record the case into the COVID-19 reporting system; e-mails are triggered from the system to Direct manager (staff)- Dean of students (students)- Facilities (disinfection)- Reslife (dorm residents) for each entity to take the required action.

Contact tracing is conducted by the clinic manually and verified by the WI-FI tracing report.

The confirmed/probable case is self-isolated and tested for COVID-19 by Speed Medical and to be subjected to medical assessment.

Negative Antigen

Case continues self-isolation then reassessed by PCR on the fourth day from the onset of symptoms.

Negative PCR

Case is assessed whether to end isolation or remain isolated according to the medical condition.

Contacts to symptomatic PCR negative cases can access campus if they have no symptoms.

Positive PCR

Positive Antigen

The case continues isolation for 10 days with close monitoring of symptoms and contacts. Cases are not allowed to access campus except after being examined and medically assessed and providing Negative PCR.

Contacts to PCR positive cases are tested for COVID-19 PCR at Speed Medical walk thru station.
