Introduction

The Office of the Provost for Research, Innovation and Creativity is proud to release the AUC Faculty Publication 2018 in recognition of the outstanding research produced by its esteemed faculty across all fields and disciplines for the year.

The report is automatically generated from the Annual Faculty Reports (AFR), the faculty database software, and follows the policy set by Graham Harman, Associate Provost for Research Administration in 2011 which requires the listing of publications that have actually appeared during calendar year. Here, I would like to quote Harman in his 2011 AUC Faculty Publication introduction: “Quantity is not everything,” he remarks, “and mere quantitative output is no substitute for quality in research and creative endeavors. It should be noted that many productive AUC faculty do not appear on this list due to the simple accident that none of their completed research happened to appear in 2011 publications. Hence absence from this list should not be construed as an absence of research or creative activities.”

The annual series was first launched in the year 2006 by Provost Ali Hadi. Following in his footsteps, we continue to serve his initial vision while building on his goals to serve AUC’s current strategic directions.

These are as follows:

• To make visible all outstanding scholarly research and creative pursuits by AUC faculty.

• To serve as a vehicle for AUC faculty members to get to know about each others’ work and interests, so as to increase interdisciplinary and collaborative research.

• To help local and international communities identify AUC faculty based on fields of specialization and expertise.

• To recognize and uphold the importance of research and creative production as an integral part of faculty responsibilities.

• To serve as an accurate and near-complete database for AUC faculty members’ intellectual output.
