

How to Participate in a Zoom Meeting

About

When you join a Zoom meeting hosted by another user, you are considered an attendee. The user who scheduled the meeting or was selected as the alternative host (if the host is unable to join) will have [host controls](#), including muting audio, using video, sharing your screen and more.

Join a Meeting

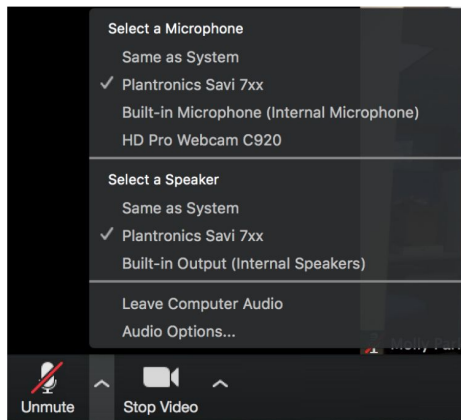

Join a meeting by clicking on a Zoom link provided by the meeting host > follow the prompts to download and run Zoom > enter the meeting ID if prompted > click to join the audio conference.

You typically have two audio choices for your live sessions in Zoom:

- From in the session using your computer/headset
- From in the session using your phone to dial in: If you have joined a session on a browser and want to use your phone for audio, click Audio Options.

When you're in the meeting, you may click on the Start Video button to start your video.

Mute/Unmute & Audio Settings

You can mute and unmute your microphone. The host also has the ability to mute you. If you click on the arrow next to the mute button, you will have additional options for audio settings. You can change your microphone, leave the computer audio or access the audio options.

Start/Stop Video & Video Settings

You can turn your camera on or off with the Start/Stop Video button. By clicking on the arrow next to the start/stop video button, you can change webcams, access your Zoom video settings, or select a virtual background (if enabled).

Participants

If you click on Participants, you can see who is currently in the meeting. The participants list also gives you the option to raise your hand or rename yourself.

- Raise Hand - notifies host and shows a prompt to simulate hand raise
- Rename - hover over your name to change it as it is seen in the participants list and video window

[Share Screen](#)

If the host allows, you can share your screen in the meeting. The host will have the ability to stop your screen share.

[Chat](#)

Chat with individuals or everyone in the meeting. Click Chat to open up the chat window and chat with other participants or view chat messages. Select the drop down next to To: to change who you are chatting with.

[Record](#)

(if host has given permission)

The host will need to give you permission to record the meeting. If you try to click on this before the host has given permission, you will receive the following message.

Note: the host is not notified that you have requested recording permission. You will need to ask them through the chat or audio to give you recording permission (available in their Manage Participants list).

Choose video layout

At the upper right of the Zoom window, you can switch between active speaker view and gallery view. You can also switch between a shared screen and the video by clicking on a button available in this location during a screen share.

You can switch between a gallery view and a view that follows the speaker. With the follow-the-speaker view, the focus moves to the current speaker as the discussion unfolds.

Enter/Exit Full Screen

At the top right of the Zoom window, you can enter or exit full screen mode. You can also exit full screen by clicking Esc.

Pin video

Pin video makes a user the primary speaker for you, instead of switching between the active speaker video. You can pin a video by right-clicking on the video of the person you want to pin or double click on their video window.

Co-annotate on screen share

If the host allows, you can annotate on their shared screen or share whiteboard. To do this, click on View Options at the top of your screen and choose Annotate.

Leave Meeting

You can leave the meeting at any time by clicking on the Leave Meeting option at the lower right corner of the Zoom window.
