Application:

[Edit Form](#)

Form

1-Abstract

State the proposal's long-term objectives and specific aims. Describe concisely the research design and methods for achieving these objectives. Avoid summaries of past accomplishments and the use of the first person. The abstract is meant to serve as a succinct and accurate description of the proposed work when separated from the application and used in other publications to promote research at AUC. Do not include proprietary/confidential information. ([keep the abstract to 1200 characters with spaces.](#))

2- Scholarly objective

The PI should list the research questions/Hypothesis or any academic objective and relate it to long term objectives if any

3- Expected Intellectual output

The PI Should place the targeted IO (expected to be reported in the final report) e.g. research publication in Q1-2 Journal

4- Expected Impact on the AUC

The PI is expected to provide evidence in brief (2-3 lines) how the the project aligns with the flourishing areas of research and/or global trends in research

5- Approach and Methodology

The PI should provide a description of the design or the methodology adopted

The PI should describe the framework/theory adopted in the academic work

The PI should demonstrate how the framework/theory is relevant to the field of study

6- Workplan

The workplan should be broken down to clear milestones with relevant resources needed and clear dependencies. A template to fill is provided([max 1 page](#)). A template can be found [here](#):

No file chosen

7- Project Budget

An Excel budget template with sample may be found [here](#) Please download it, fill it and upload it:

No file chosen

Budget Justifications e.g. RA X days X weeks aligned with the work plan, equipment : reason for purchase aligned with work plan, are placed here

Budget assumptions are stated e.g rate used for RA, equipment for purchase are not available at the AUC

8- Compliance

Applicants are reminded that all projects involving human subjects require approval by AUC's Institutional Review Board (IRB) before funds are awarded and the research can begin. Please view the Institutional Review Board [page](#). You will be required to provide a copy of your approval notification or protocol number for approved projects.

Research with human participants:

- Yes
- No

If yes, has the protocol been submitted with IRB:

- Yes
- No

If the protocol has been approved or exempt, list the protocol number:

9-Student Assistants

If you plan to have undergraduate or graduate research assistants in the project, please specify their roles and seniority here

10- Clarifying Remarks

If you have any additional comments that you think would add to the importance of this project, Please add them here:

Add more documents

 No file chosen

11- CV

Upload PDF file (max 4 pages) for the CV of each project investigator

 No file chosen

12- Interdisciplinary Projects

The role of every discipline should be clearly and briefly described here

Value added to the project from interdisciplinarity should be briefly described here

13- Projects that involves external collaboration

The added value of having an external collaborator should be briefly and clearly described here

The anticipated contribution of the external contributor(S) to the project intellectual output.
