

# Provisioning Blackboard Course with Panopto

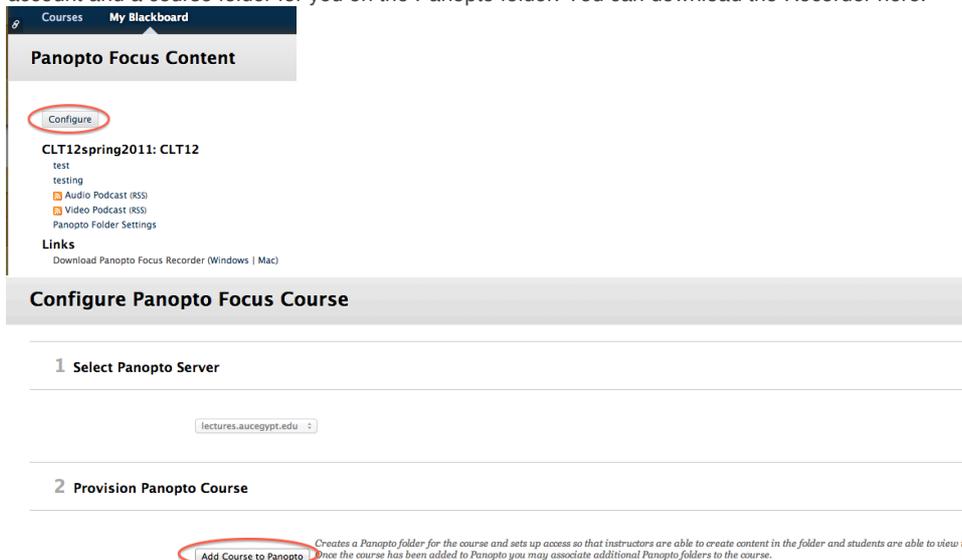

1. Go to your Blackboard course page and on the left menu click on “Tools”

2. Click on “Panopto Focus Content”

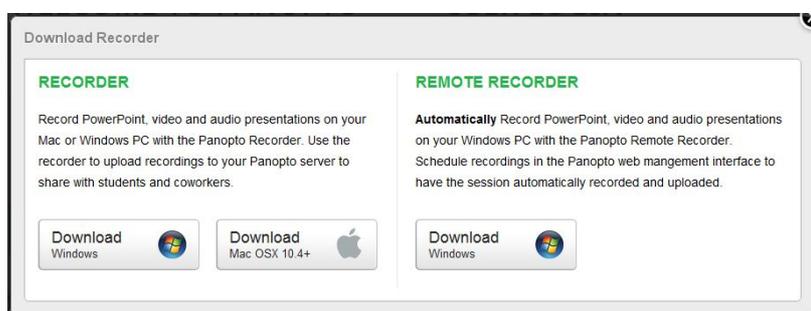

3. Click on “Configure” then “Add Course to Panopto” followed by “Submit”. This will create a creator account and a course folder for you on the Panopto folder. You can download the Recorder here.

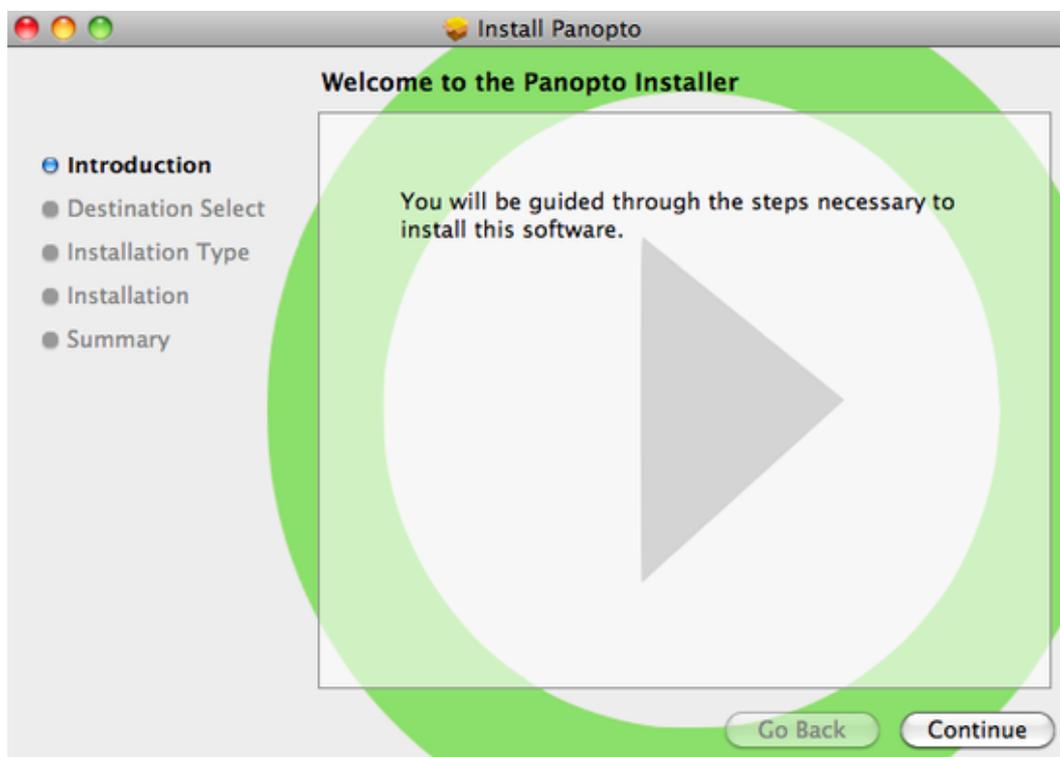

# Panopto Mac Recorder Installation

## Installation

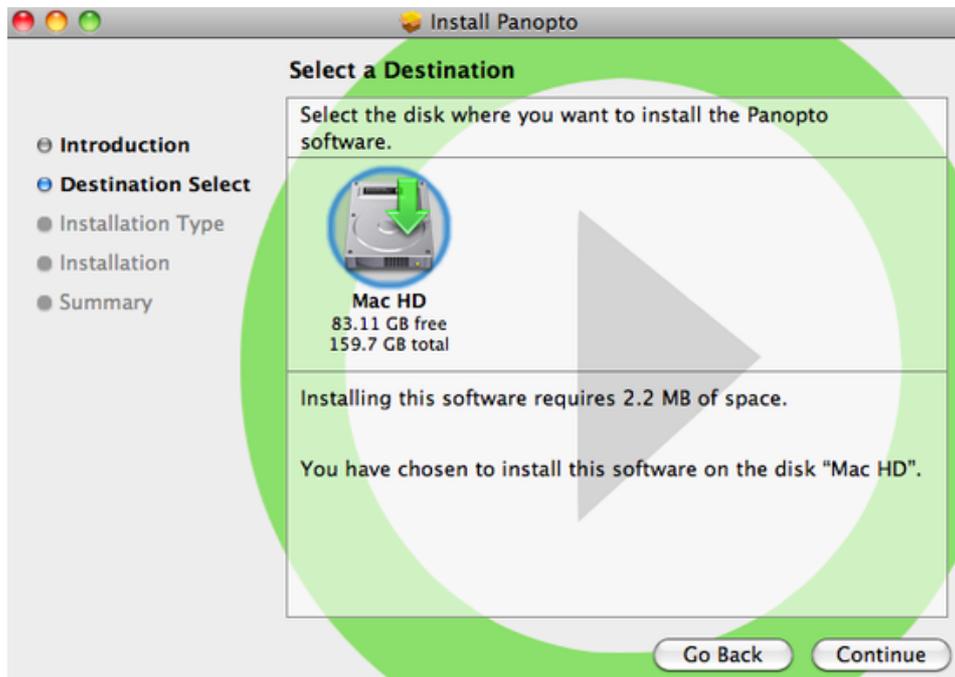

4. Go to <http://lectures.aucegypt.edu> and insert your username and password. Click "Log In", You will be automatically redirected to the Sessions page. Alternatively you can choose to "Login with AUC-Blackboard" if you have provisioned your course from Blackboard.
5. You can download the Recorder by clicking on the "Download Recorder" button on the Portal Page, or by clicking in the top right of the Sessions page.
6. Both options will show a popup that will allow you to download the Recorder for your operating system.

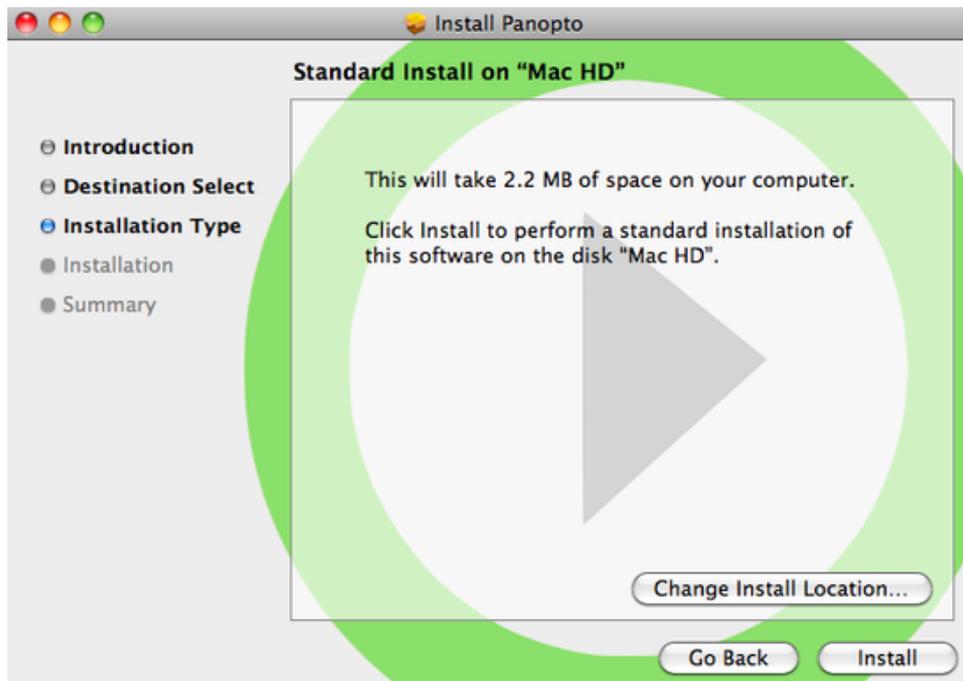

7. 4. Run the "Panopto Recorder.pkg" file
8. 5. Click **Continue**

6. Click **Continue**

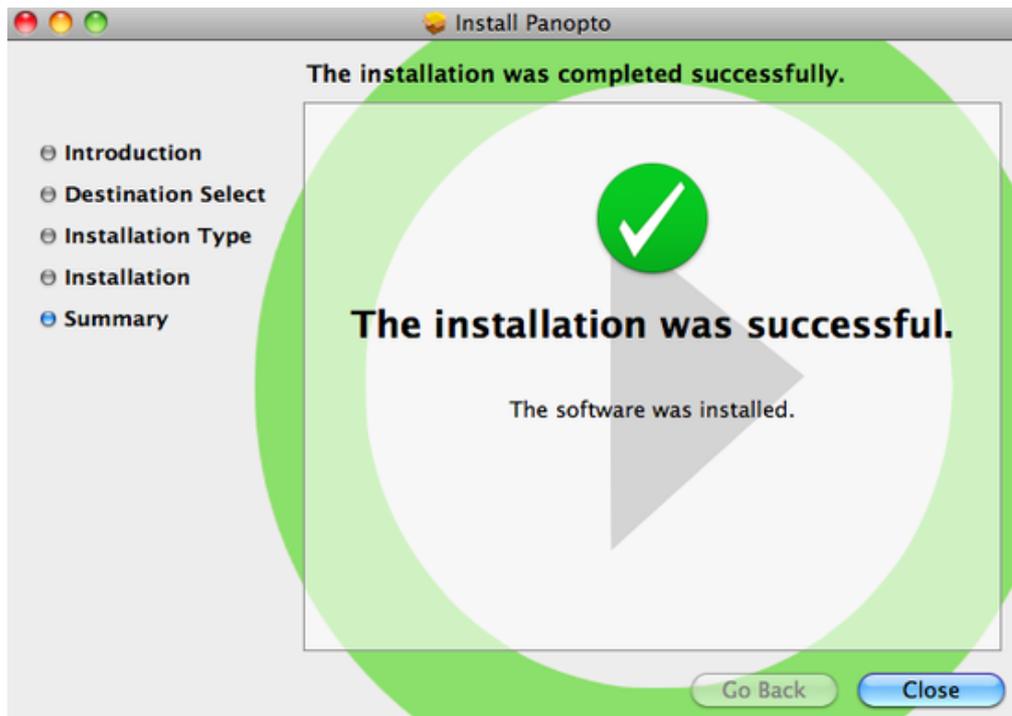

7. Click **Install**

8. If prompted, insert credentials for installation

9. Click **Close**

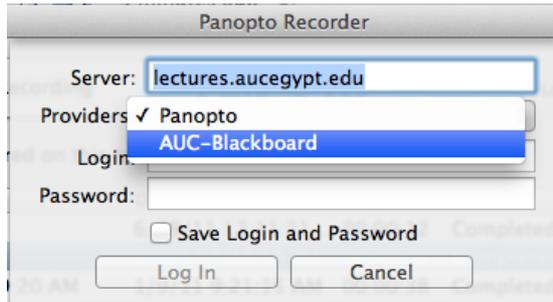

## Mac Recorder Configuration:

### Initial Configuration

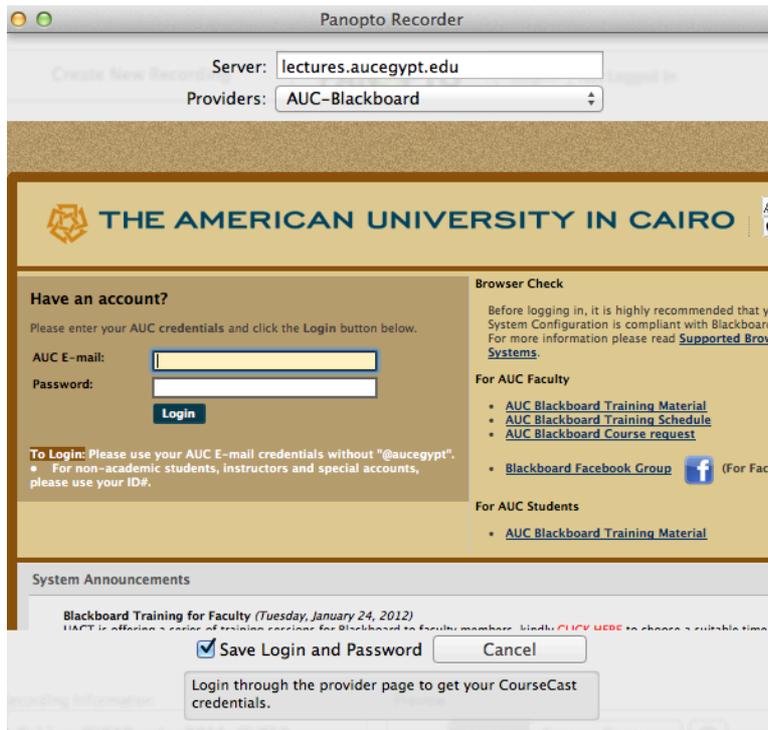

1. Locate the Panopto Recorder under Applications (If you'd like, drag the Panopto Recorder to the Dock for easy access) and run the app.
2. Click **Login**

- 2.a. If you have provisioned Panopto from your Blackboard, please choose "AUC-Blackboard" from the Providers list

2.b. It is recommended that you **Save Login and Password** to avoid this step in the future

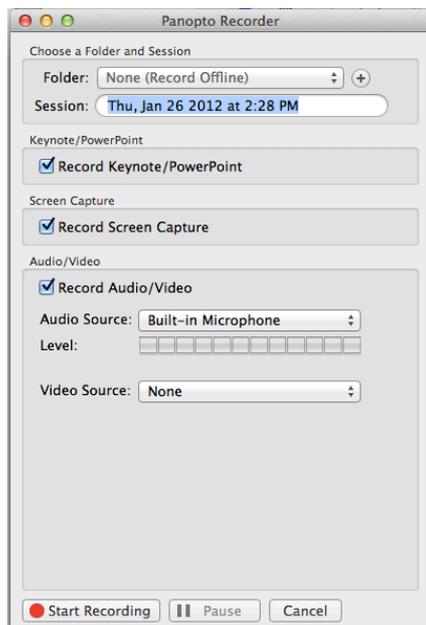

3. Insert the appropriate credentials, then click **Log In**

4. Click **Create New Recording**

5. By default the Recorder is set to "None (Record Offline)." You can record content offline and upload to the server at a later time. If you would your recording to be automatically uploaded directly to a folder on the Server, click on the up/down arrows to select a folder. Or create a folder by clicking on the "+" sign.

## **Additional Settings**

1. In the menu bar, click on **Panopto Recorder, Preferences**

2. These settings can be customized to your preference.

**Upload recordings automatically:** upon the completion of the recording the files will be uploaded to the server.

**Capture high quality video:** this setting will adjust the quality of the recording you are making.

**Max Screen Capture frame rate:** by adjusting the frame rate you can set the amount of Frames Per Second (FPS) that the screen capture function will capture your screen.

Recommended to set it as **10 Frames/Second**

### **Install Microsoft Silverlight Player**

Installation of Microsoft Silverlight player is only required for viewing recordings. It can be downloaded at <http://www.microsoft.com/silverlight>
