Report on the Results of the
FIRST-TIME FRESHMEN SURVEY 2012

Data Analytics and Institutional Research (DAIR)
May 17, 2013
INTRODUCTION
In Fall 2012, the Office of Data Analytics and Institutional Research (DAIR) developed, in cooperation with the AUC Assessment Committee, a survey instrument designed to elicit information from incoming freshmen that allows for a snapshot of what students are like before they experience college, including established behaviors in high school; academic preparedness; admissions decisions; expectations of college; interactions with peers and faculty; student values and goals; student demographic characteristics; and concerns about financing college.

The survey is adapted from the Freshman Survey, part of the Cooperative Institutional Research Program (CIRP) and administered nationally by the Higher Education Research Institute (HERI) at UCLA's Graduate School of Education and Information Studies, and modified to accommodate AUC’s student population and high-school and family characteristics. This survey is designed to closely track topics addressed in CIRP’s Your First College Year survey and the College Senior Survey to provide information for longitudinal analysis of cognitive and affective growth.

METHODOLOGY
The survey instrument was developed on a scannable form and administered as a hard copy to first-semester freshmen during the second day of orientation (FYE), on August 29, 2012. The director of assessment and planning met with FYE facilitators prior to orientation to introduce them to the survey and answer questions. Instructions to the faculty were also provided with the faculty materials. These instructions specified that surveys were to be distributed only to first-semester freshmen, that the survey was voluntary and responses would be kept confidential, and that students should complete the survey to the best of their ability. Faculty facilitators were instructed to provide explanations of questions or words that were confusing to students. Chocolate bars were given to students completing the surveys as incentives.

The survey took 20-40 minutes to complete, with some facilitators responding that it took up to an hour for their students. Seven hundred and sixty-one students completed the surveys, out of a first-time freshman population of 965 enrolled students, for a participation rate of 78.9%.

SUMMARY OF RESULTS
Demographics
Seventy percent of entering freshmen respondents are 18 years old, and 95% completed high school in 2012. More than 90% are enrolled as full-time students. Ninety-three percent of respondents are Egyptian, and 13% report having a second citizenship.

Freshmen respondents commute to campus, with more than 80% of reporting living more than ten kilometers from campus, and of that percentage, 30% living at a distance of more than 50 kilometers. Eighty-seven percent plan to live with their families. Eighty-six percent report that both of their parents are alive and living together. The majority of both fathers and mothers attended at least some university, but 84% of respondents report that neither of their parents attended AUC.

Sixty-five percent of first-time freshmen respondents applied to universities other than AUC. Ninety-two percent were accepted by their first-choice university, and for 75% of respondents, AUC was their first choice. The most important reasons for joining AUC were the university’s academic reputation (95%), jobs for graduates (91%), admission to top graduate or professional schools (82%), family preference (79%), and friends or family had attended AUC (61%).

Nearly 80% of respondents identify themselves as Muslim Sunni liberal. Forty-three percent of all first-time freshman respondents report attending prayers or religious services frequently during the past year, while only 29% report discussing religion frequently.

Forty-seven percent of our students consider themselves liberal and 43% middle of the road, in terms of their political views. Only 8% consider themselves far left, and 3% consider themselves conservative. Less than 1% consider themselves far-right. Most incoming freshmen have not participated in a protest during the past year: 61% of respondents report they have not demonstrated for a cause during the last year. Yet they are interested in
politics: 88% report that they had discussed politics occasionally or frequently during the past year. Forty-seven percent communicated publicly their opinion about a cause, and 64% helped raise money for a cause or campaign.

Fifty-one percent reported that the current economic situation significantly affected their college choice, and 59% reported concern about their ability to finance their education. Most freshmen are financing their first year of education from family resources. Nearly 84% report that they do not expect to cover their first-year’s educational expenses from their own resources, and 87% report that they do not expect to use aid that needs to be repaid.

**Academic Preparation**
Most freshmen -- nearly 80% -- report attending private secular schools. The most frequently cited certificate was American high school, with 38% reporting that they obtained this certificate. The next most common was GCSE, with 22%.

AUC’s freshmen are numerate: 96% report completing algebra, 87% trigonometry, 72% probability and statistics, and 71% report studying math for four years of high school. Only 0.1% report not studying math at all in high school.

AUC’s entering freshmen had extensive preparation in English and other languages. Seventy percent report studying English language for four years of high school, and 92% studied for at least two years. Ninety-six percent report studying Arabic in high school, and 86% report studying a language other than English or Arabic in high school.

**Academic Outcomes/Engagement**
In general, students reported high levels of academic engagement during the past year, supporting opinions with logical arguments (96%), seeking solutions to problems (97%), asking questions in class (96%), integrating skills and knowledge from different sources (95%), and more. Students expressed confidence in their academic abilities, with the highest ratings in working effectively on their own (93% rating themselves as somewhat or very strong) and in collaboration with others (82%), using information and critical thinking skills to analyze and solve problems (88%), accessing and organizing information (85%), and communicating clearly and effectively in writing (82%). The most frequently cited weaknesses were expressing themselves clearly in class discussions or oral presentations (28% rated themselves as somewhat or very weak) and reading critically (23%). Students rated themselves highest in their academic ability, with 73% of students rating themselves as above average or in the highest 10% as compared to the average person their age. Other strengths cited were understanding of others (72%), drive to achieve (68%), self-understanding (64%), and cooperativeness (62%). Weaknesses cited were artistic ability (35% rated themselves as below average or lowest 10% as compared with the average person their age), public speaking ability (22%), and mathematical ability (15%).

Fifty-four percent reported that there was little or no chance that they would participate in student protests, and 53% reported that there was little or no chance that they would participate in student government.

**Health and Wellness**
Incoming students report that they are non-smokers: 84% said that they have not smoked cigarettes in the past year. They also report that they are generally not drinkers: only 15% reported that they had drunk beer, and 16% reported that they had drunk wine at some point in the past year.

Most freshmen respondents reported exercising during the week, with only 9% reporting that they had not exercised or engaged in sports. Our incoming class is also social: 68% reported spending six or more hours per week socializing with friends, with 17% reporting spending more than 20 hours. Freshmen also reported socializing online through Facebook and other social networks: 46% reported spending six hours or more in a typical week on these networks. Only 16% reported spending six hours or more reading for pleasure, and only 13% reported spending any time during a typical week working for pay.

Incoming freshmen reported high levels of stress: 87% reported that they had felt overwhelmed by all they had to do frequently or occasionally during the past year, and 74% report having felt depressed. Fifty-eight percent reported having fallen asleep in class frequently or occasionally during the past year. Fifty-three percent said that there was a chance they would seek counseling.
Diversity
First-time freshmen respondents, by a large majority, reported believing in equal rights under the law. Ninety-five percent feel that women should have the same rights as men, 96% believe in equal treatment regardless of social class or connections, and 97% believe in equal treatment under the law regardless of religion. Ninety-two percent believe that all members of society, particularly the wealthy, have a responsibility to improve the lives of less advantaged people. Sixty-percent believe that AUC should not prohibit religious or political speech on campus, and 93% feel that debating or discussing ideas and viewpoints is a critical component of the political process. Sixty percent, however, report believing that there is little that an individual can do to bring about change in society.

Career Planning
Business Administration is the most frequently cited intended major, with 18% of students selecting it as their probable major, followed by Mechanical Engineering (10%), Architectural Engineering (7%), Economics (7%), and Political Science (6%). Ninety-two percent of freshmen respondents reported that they intend to pursue studies beyond the baccalaureate level: 41% stated that the highest academic degree they plan to obtain is a master’s degree, and an additional 41% intend to pursue a doctorate.

When asked about probable careers, 29% of students replied that they were probably going to become engineers. The next most frequently cited career was business executive (15%), business owner (9%), architect (7%), and computer programmer or analyst (4%). Eleven percent of respondents were undecided.

Eighty-five percent of incoming freshmen respondents indicated that being well-off financially was essential or very important to them. Other goals that were frequently cited as essential or very important were helping others in difficulty (82%), becoming successful in a business of their own (78%), raising a family (75%), and improving their understanding of other countries and cultures (73%).

The appendix reports results by high-school certificate.

**Combined Importance for the Student Personally**

- Being very well-off financially: 84.7%
- Helping others who are in difficulty: 81.6%
- Becoming successful in a business of my own: 77.5%
- Raising a family: 75.0%
- Improving my understanding of other countries and cultures: 73.3%
- Becoming an authority in my field: 72.9%
- Obtaining recognition from my colleagues for contributions to my special field: 67.9%
- Influencing social values: 64.3%
- Adopting "green" practices to protect the environment: 57.9%
- Helping to promote racial understanding: 57.7%
- Developing a meaningful philosophy of life: 55.7%
- Becoming a community leader: 54.3%
- Participating in a community action program: 53.2%
- Becoming involved in programs to clean up the environment: 50.4%
- Keeping up to date with political affairs: 48.2%
- Making a theoretical contribution to science: 39.0%
- Influencing the political structure: 38.9%
- Creating artistic works (painting, sculpture, etc.): 30.6%
- Becoming accomplished in one of the performing arts (acting, dancing, etc.): 27.8%
- Writing original works (poems, novels, etc.): 26.3%
