Introduction

For the sixth straight year, we offer a list of publications by faculty of the American University in Cairo. Other than an isolated effort in 1982-83 by I. Moyer Hunsberger (then Vice President for Academic Affairs and Dean of the Faculty), the AUC Faculty Publications List can be said to have been inaugurated in 2006 by former Vice Provost Ali Hadi, whose clear format we continue to follow today.

As the interests of our faculty develop over time, we may add or subtract various categories from the publications list. This year we offer three new categories.

AW stands for “archaeological work,” which is done in large quantities at AUC (especially by our Egyptology faculty), but which used to be included somewhat awkwardly under “CW” for “Creative works.” The CW heading will now be reserved for its primary purpose: classifying achievements in the arts.

CS stands for “case studies,” which have become increasingly important in our School of Business. Previously such case studies were classified in various categories on an *ad hoc* basis. The time has come to recognize them as a valuable category of their own.

ME stands for “media appearances,” by which we mean primarily radio, television, and podcast appearances, as opposed to being quoted in a news story (which would not go on the publications list at all). We needed a new way to classify such events, which are especially frequent in the Department of Journalism & Mass Communication.

All publications included in this list appeared or were accomplished in 2011, with a 2011 copyright date where applicable. Forthcoming work will be included in future lists at the time of its appearance. The only exception is that 2010 work omitted or unreported last year is also included in this list. But the count of publications by department only includes works of 2011.

This list offers further confirmation of what we already knew unofficially and anecdotally: AUC is emerging as a research power, having already established a reputation for teaching excellence over many decades.

Names of schools, departments within schools, and faculty within departments are given in alphabetical order.

Deans are listed by name at the beginning of their respective schools. For the purposes of calculating departmental publication totals, deans are counted either with their original home departments, or with their most natural departmental fit (e.g., Dean Nabil Fahmy with the Department of Public Policy and Administration, Dean Bruce Ferguson with the Department of Performing and Visual Arts).
